Work Experience

Job 1

Repair Technician

King Communication – Ashton

https://kingcommunication.business.site/

December 2016 to July 2018

My main job was to repair mobile phones and laptops and other electronics. I also made software tools such as batch files to assist me in fixing mobile software problems. My secondary job was to interact with customers and try to sell products to them.

I worked there as a volunteer so that I could build up my work experience and learn new life skills.

Job 2

Online Seller

Imperial Bedding - Oldham

December 2017, still currently working

In this job, I am selling duvet covers and mattresses and other products on an online eBay shop. I used to pack the products and send them off. I also used to interact with the customers online to make sure that they were satisfied with our service.

My biggest accomplishment was being able to handle the dissatisfied customers and to convince them to feel happy about their purchase and our service and to make them a repeat customer.

Job 3

Personnel care assistant

Kaleidoscope Brokerage - Bury New Road

August 2019, still currently working.

My main job role is to look after children that have some sort of disability. I am looking after one child at the moment and in the future, I would like to look after more.

Job 4
Carer
Total Care Nursing Home Chadderton
October 2019, still currently working.

My main job role is to look after old people that have some sort of disability, and provide personnel care for them.

My skills:

Languages

- C#

- VB.Net

- ASP.Net

- C++ (still learning)

- JavaScript (Still learning)

- HTML

- CSS

Other Software:

- Unity 3D game engine

- Blender

- Microsoft access

- Microsoft Office

- Photoshop

IDE's

- Visual Studio

- Visual Studio Code

- Code::Blocks

- Brackets

- Mono Develop for Unity

Spare time projects and activities

I have made 2 games that I have published using the Unity game engine and the programming language C#. Trackland and Block Runner, these are available on our website: https://wreck-it-games.weebly.com/. I am now currently working on my third game that I want to publish, this game is almost in the prototype stage. I am currently working with my team in developing our third game which will be a first-person zombie's shooter.

I have made a database using the programming language Visual Basic.Net. This was made for the phone shop I was working at. I used multiple notepad files and linked them all together using primary keys and foreign keys.

I have experience with Microsoft access and visual basic Access. I made the same database that I made in visual studio with Visual basic.Net, but I made it in access. This was easier to make because it was mostly drag and drop.

I have made a few websites using Html and CSS and the backend of the website was created using ASP.Net. This was for my project for web development module.

I have experience with Visual Studio and Mono Develop for Unity. I have made a website using Visual Studio using ASP.Net and the scripting language HTML and CSS.

From the experience I gained from the job where I was selling items online, I made my own eBay shop where I sell phone cables and accessories and other technology items and also some rare coins, this is the link to the shop: https://www.ebay.co.uk/usr/muiz2899?_trksid=p2047675.l2559.

One of my favourite activities is going to the gym and doing weight training. My main aim is to build a very attractive physique. I have been going to the gym for almost 2 and a half years, I started going in September 2016 when I first started college. I go to the gym 3 times a week, Monday, Wednesday and Friday (if not Friday then Saturday). If it is my holidays, then I go 6 days a week from Monday to Saturday.

One of my best life experiences was doing NCS in 2016, It was like summer school, but it built my confidence up to where I could give speeches in front of people. It also thought me how to do proper teamwork. At NCS we went on hikes, water rafting, canoeing, rock climbing, scrambling, and many more fun and exciting activities. This was one of my happiest and exciting experience of my life so far.

Education

University of Salford

Degree in Computer Science

September 2018 to May 2022

I am currently studying at this university and I have already done a few projects. One of my projects was to make a questionnaire for an Acoustics sculpture using C# and in visual studio. The project I am currently working on is a web application using HTML and CSS using the ASP.NET technology with C# for the backend of the web application.

I have done a module where my group had to give a 10- or 20-minute presentation to the class about a topic of our choosing, and we also had fill in feedback sheets for other groups. I have given a presentation on different storage devices and another presentation about different types of touch screens and my final 2 were about the different types of display technologies like LCD and LED.

I am also doing maths there, it is one of my modules and I really enjoy maths and learning about infinity and Euler's number and binomial functions and much more.

Oldham Sixth Form College

From September 2016 to May 2018

I Studied Computer Science, Business and ICT at this college.

In Computer Science I studied the theory behind computer hardware and software and how it works. I also learnt the programming language Visual Basic.NET. I made a stock control system using relational databases and Visual Basic.NET. I made this for the phone shop that I was currently working at.

In ICT I made a similar application to my computer science one but this time it was in Microsoft Access and I used a bit of SQL in it too.

In business, I learnt about how to start a business and how to manage it. It thought me how to hire people and how to treat employees and what their needs are and how to meet them.

I also did Paediatric First aid at this college.

Qualification

A Level WJEC Information & Communication Technology

Grade

D

Qualification

A level Edexcel Business

Grade

D

Qualification

A Level EDUQAS Computer Science

Grade

C

Qualification
